

Bowman's Hill Wildflower Preserve's mission is to "*inspire the appreciation and use of native plants by serving as a sanctuary and an educational resource for conservation and stewardship*". The Plant Grants Program supports the Preserve's mission by educating the public about the environmental value of native plants and assisting gardeners in transitioning to native landscapes. Grantees that use donated plants from the Preserve should recognize Bowman's Hill Wildflower Preserve on a sign (included with grant) and highlight the benefits of planting native species through additional educational signs or through other interpretive activities.
